Wonderful Tonight	Pattie Boyd	3.00

Sleeveface

If you've not witnessed this yet then Sleeveface is this year's internet craze.

The Sleeveface phenomenon started by two customers of ours that live down the road in Cardiff, but swiftly spread through the web into a global success. The concept is so simple, yet ingenious.

All you have to do is obscure part of your body with your favourite (or most amusing) LP sleeve, get the perspective right, and take a photograph.

If you have a sense of humour and a love of cover art, this is for you!

After making people laugh out loud on the web, and following a feature in People magazine, some of the best web images have made it into this new book. It's brilliant! We guarantee you won't be able to put it down.

Last Shop Standing

LAST SHOP

Graham Jones' book documenting the

decline of record shops in the United Kingdom. Graham undertook a tour of Britain's remaining shops and has collected a wealth of stories that explain why the best are still standing and how the worst of them blew it.

Our very own Mark is featured in the book and there's a very fetching photograph of him outside the shop.

The book is a must for every person young or old that has spent their free time rummaging around their local record shop.

RECORD COLLECTOR'S LP GRADING SYSTEM

In order to assist everyone who buys and sells rare discs, Record Collector magazine has originated a set of standards for the condition of second hand records, cassettes and CDs. The seven standard condition categories, and a description of what each one means, are listed below:

- MINT:** The record itself is in brand new condition with no surface marks or deterioration in sound quality. The cover and any extra items such as the lyric sheet, booklet or poster are in perfect condition. Records advertised as Sealed or Unplayed should be Mint.
- EXCELLENT:** The record shows some signs of having been played, but there is very little lessening in sound quality. The cover or packaging might have slight wear and/or creasing.
- VERY GOOD:** The record has obviously been played many times, but displays no major deterioration in sound quality, despite noticeable surface marks and the occasional light scratch. Normal wear and tear on the cover or extra items, without any major defects, is acceptable.
- GOOD:** The record has been played so much that the sound quality has noticeably deteriorated, perhaps with some distortion and mild scratches. The cover and contents suffer from folding, scuffing of edges, spine splits, discoloration, etc.
- FAIR:** The record is still just playable but has not been cared for properly and displays considerable surface noise; it may even jump. The cover and contents will be torn, stained and/or defaced.
- POOR:** The record will not play properly due to scratches, bad surface noise, etc. The cover and contents will be badly damaged or partly missing.
- BAD:** The record is unplayable or might even be broken, and is only of use as a collection-filler.
